Hola World! I'm Enrique and I build **high-quality** web applications.

WORK EXPERIENCE

Software Engineer

GitHub

Aug 2018 - Now

- Implemented parts of the backend infrastructure that powers GitHub Sponsors using Ruby on Rails, GraphQL, and some JavaScript.
- Developed and maintained several areas of GitHub Marketplace, including on boarding GitHub Actions for discoverability.

Senior Software Engineer

Skookum

Nov 2014 - Aug 2018

- Designed a microservices-based architecture and developed most of the microservices for an e-commerce platform using Ruby on Rails, Docker, and AWS (ECS, SQS, SNS).
- Implemented a campaign management system for digital ads using Node along with the Apollo GraphQL engine and client.
- Worked on a variety of other projects involving Go, React, Styled Components, GraphQL, and Rails.

Software Engineer

KYCK

Nov 2013 - Nov 2014

- Built and supported a monolithic Rails application for youth soccer leagues, which handled around 400 requests per second.
- Started transition of an older Rails application to a microservices architecture using RabbitMQ.
- Supported front-end of various applications written in Angular 1.x.

Computer Science Instructor

UNCC

Aug 2009 - May 2012

- Led a lab of 20+ students each semester to cover lecture topics.
- Provided 1-on-1 mentoring on multiple CS concepts.
- One of the most rewarding experiences running into former students and learning about their success as engineers.
